Dear Guy and Robert,

As I am sure you are already aware but the link to the terms and conditions of use is <https://www.protectedplanet.net/c/terms-and-conditions>.

Within this No Commercial use is defined as

No Commercial Use

Neither (a) the WDPA Materials nor (b) any work derived from or based upon the WDPA Materials ("Derivative Works") may be put to Commercial Use without the prior written permission of UNEP-WCMC. For the purposes of these Terms and Conditions, "Commercial Use" means a) any use by, on behalf of, or to inform or assist the activities of, a commercial entity (an entity that operates 'for profit') or b) use by any individual or non-profit entity for the purposes of revenue generation. For commercial uses, please go to the IBAT website: <https://www.ibat-alliance.org/>.

For the avoidance of doubt, UNEP-WCMC reserves the right to determine whether a particular use of the WDPA Materials constitutes a Commercial Use or otherwise.

To summarise, our definition of commercial use in a) is in relation to the end user. If an organisation (not for profit or otherwise) is working for the benefit of a commercial entity this is deemed as commercial activity. In the case of b) any use of the dataset which produces revenue whether it be for "not for profit" or not, is considered as commercial use. Finally, we do take a bespoke approach to discussing use cases and determining commercial use.

In relation to The Holdridge Life-Zones and the World Dryland Areas I think we are happy to give permission for their use.

In relation to using and storing of versions of the WDPA, I wonder whether you could make use of the fact that Google Earth Engine stores all month versions of the WDPA on their system?

It would be great to stay in touch on this and see what avenues can be explored.
